# Geometry, A Multi-Platform DeFi Ecosystem, Built With Innovation, Sustainability, & Growth As Its Core Features

DeFi's Next Step

MISSION STATEMENT

---

**To become an industry leader in the DeFi space, through innovation & a uniquely fresh perspective on how DeFi operates.**

# The Current DeFi Space Is Stuck In A Rut...

After the first wave of DeFi platforms, the space has become crowded with many platforms who offer very little in the way of innovation

This stagnation and lack of innovation has led to a market saturated with platforms that are more or less the same, with very little to differentiate one from another

Unlocking the next cycle of DeFi innovation is now available to projects that prioritize it...

# The Solution?

**A new perspective on how DeFi platforms work, and operate**

**A multi-platform DeFi ecosystem, built around innovation, sustainability & growth**

**A place where users can access cutting-edge DeFi tools**

As part of our foundational work to create robust building blocks for the Geometry ecosystem, we have onboarded 6 world-class specialists to advise in their fields of expertise.

**Decentralized Finance:**  
**Julien Klepatch**

Founder of EatTheBlocks  
Leading DeFi Influencer &  
Educator

**Brand Management:**  
**Dennis Roelofsen**

Founder of Yura  
Worldclass Design & Branding  
Expert

**Tokenomics:**  
**Hristo Piyankov**

Founder of Findas  
Prolific Economics & Tokenomics  
Expert

**Legal & Regulation:**  
**Guy Maevsky**

Founder of Guy Maevsky Legal  
Leading Crypto Legal & Regulatory  
Specialist

**Finance:**  
**Mauro Terrinoni**

Founder of Enerinvest  
Ex-JP Morgan, Citi, Fortress Corp.  
Finance Expert

**Financial Operations:**  
**Leandro Marcarian**

Chief economist at Fineco Advisors  
MSc Financial Economics,  
University of London

**Innovation is built right into the core of the Geometry ecosystem. Starting with Helix, our soon to launch AMM, users will be able to access a range of powerful DeFi tools**

## **Helix Yield Vaults**

Helix vaults are an effective method of incentivising long-term liquidity locking on the platform, centred around yield rates that increase the longer the liquidity is locked.

## **Single Asset Staking Pools**

Helix Staking Pools are the easiest way to put your crypto to work earning more tokens, and unlike providing liquidity to farms, staking pools require only a single asset - removing the risk of impermanent loss, just stake and earn!

## **Yield Farming**

Helix Farms are a way of facilitating trading on the platform - by incentivising deposits of two assets into a trading pool which allows users to earn yield from trading fees.

# Token Swaps

At its core, Helix is a decentralized exchange offering its users the ability to quickly, safely, and cheaply trade one token for another, in a decentralized & permission-less environment.

## NFT Staking

Owners of a Geobot can deposit their NFTs to earn passive rewards from a staking pool, funded through platform fees.

## Voting

Voting and participating in the governance of the protocol is one of the core utilities of the HELIX token, empowering holders with a direct say in the future developments of the platform.

Boost

**Interest rate swaps are some of the most highly used financial instruments in legacy finance, with a global market size of over \$488 Trillion**

Statistics prove that the need for this service shows no sign of slowing down...

As funds continue to migrate on-chain, providing similar tools for the creation of complex financial strategies is essential, especially in the volatile world of DeFi yield markets.

With first-mover advantage, & a broadening range of DeFi products, **Helix aims to capture much of this future TVL**

# HELIX

## Referral System

The Helix referral system allows anybody to earn rewards from the platform, just for telling a friend, and the more they trade, farm, and earn, the **more the** referrer earns too!

No KYC required, just connect with a wallet, grab your personalised referral link, and start earning HELIX, even while you sleep!

Farm & Staking Commission

# A Dedication To Innovation

The DeFi space moves fast, in order to keep ahead of the competition we've hard coded innovation into the very foundation of Helix itself. This provision will be pivotal in the success of Helix, and Geometry as a whole.

## Single-Click Liquidity Migration

The Single-Click migration feature is a powerful tool that simplifies moving liquidity from other platforms to Helix, making it easier, cheaper, and faster to start earning rewards.

## Geometry Skunkworks R&D

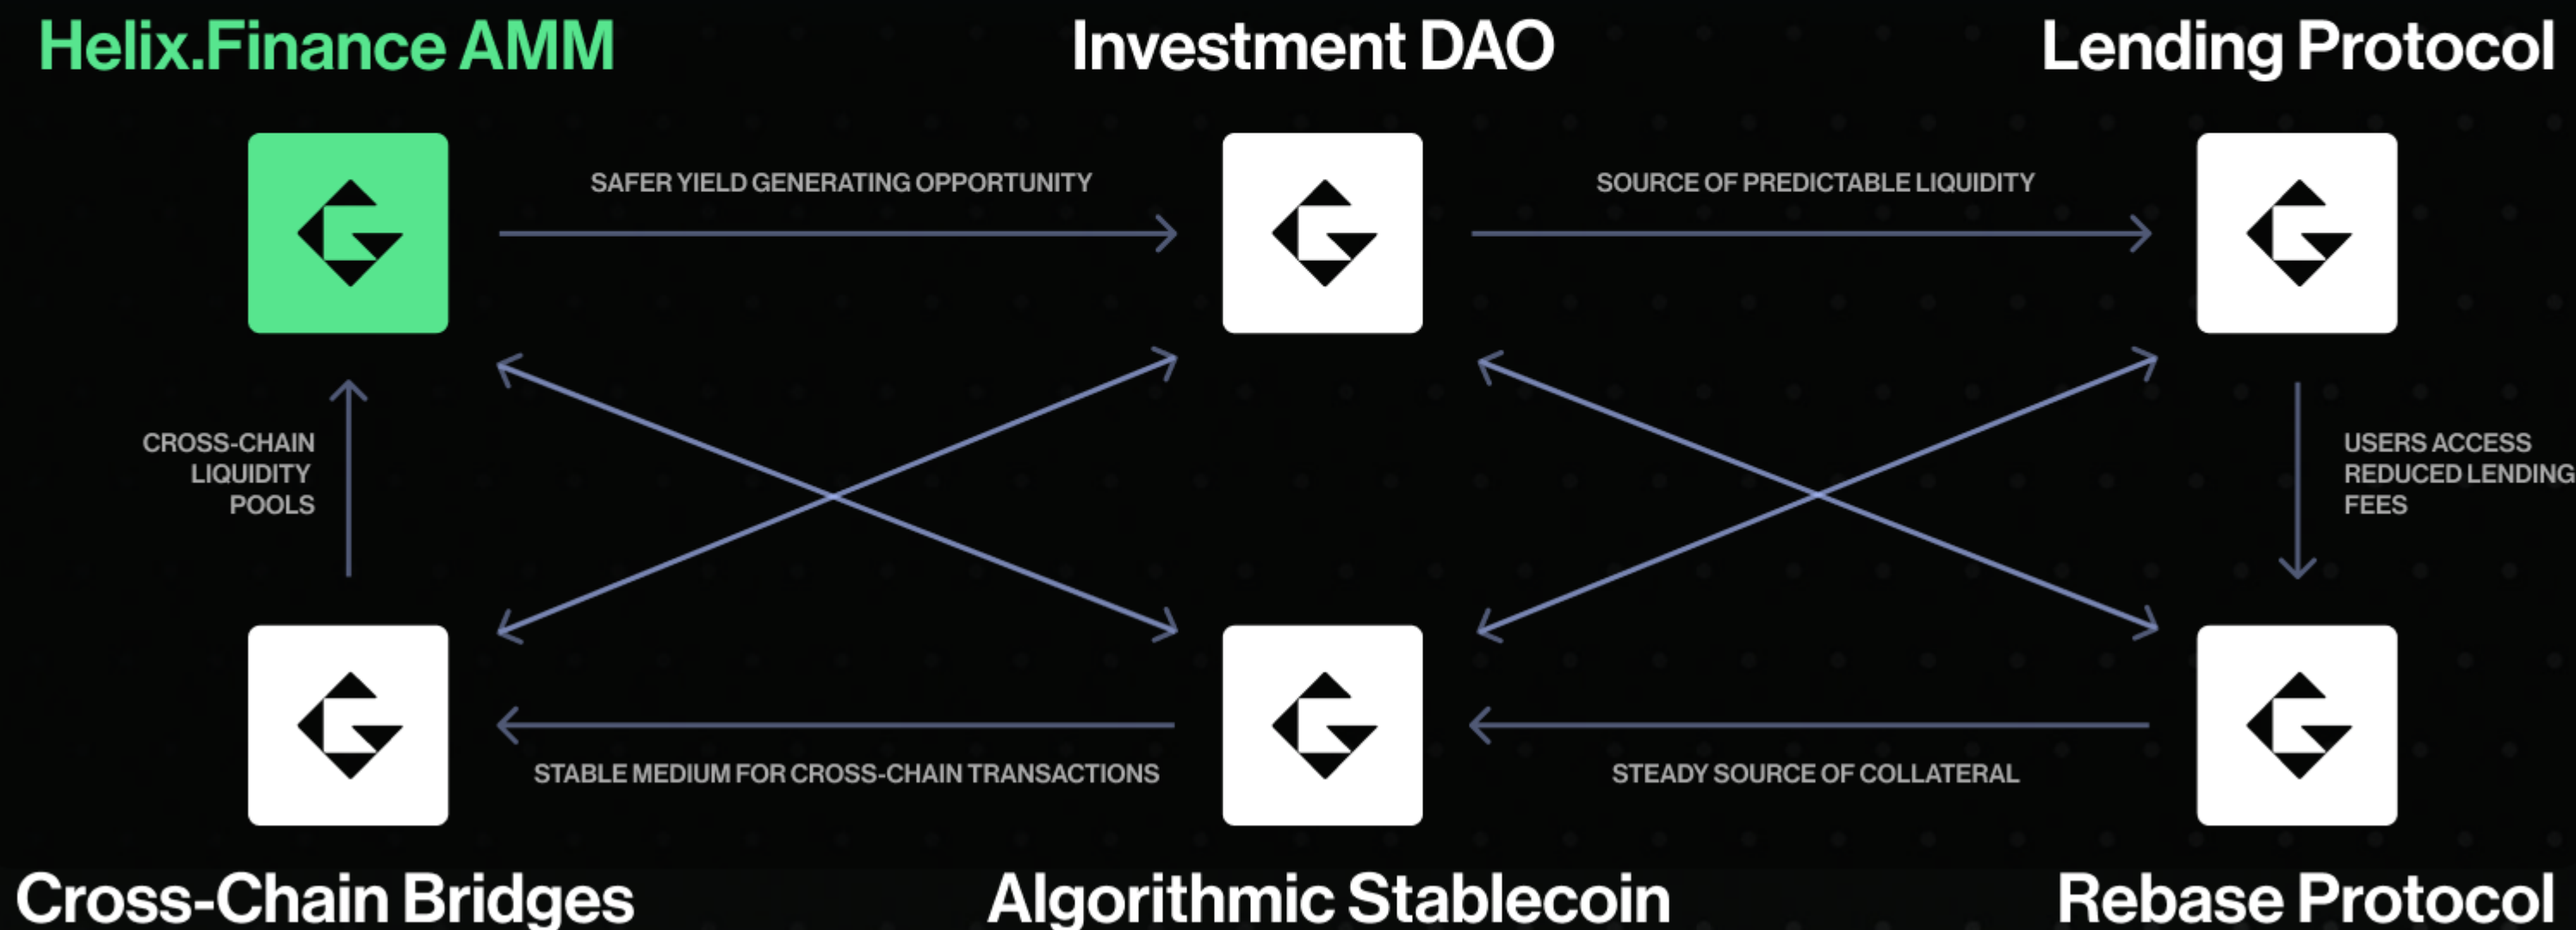

Geometry Skunkworks is the project's decentralized finance research and development think tank, bringing academics, professionals, and entrepreneurs from a diverse range of disciplines together to discover novel DeFi models.

SLL

While the Helix AMM is an important step into the DeFi space for Geometry - it's only the beginning. We are building a family of protocols that will be interconnected and will work together to provide an optimal environment for liquidity growth and financial efficiency.

This is the evolution of Geometry that we envision.

# The DeFi Market Is Estimated To Be Worth Around \$108B

With Over 1,100,000 Transactions Per Day  
On Ethereum Alone

As Mass-Adoption Occurs, We Believe This  
Number Will Continue To Grow

# Platforms In The Geometry Ecosystem Collect Fees From Every Transaction

On Helix, This Includes Trading Fees, And Those Applied To  
Vaults, Yield Swaps, And Harvesting Referral Rewards

# HELIX Distribution Overview

# HELIX

## Tokenomics

HELIX is the native ERC-20 of the Helix.finance automated market maker (AMM) and can be used to interact with the platform in various ways that relate to financial activities and governance.

HELIX will be emitted over the course of 6 years with a maximum possible supply of 1,000,000,000 tokens.
